Java

```java
class Solution {
    public List<String> stringSequence(String target) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string} target
 * @return {string[]}
 */
var stringSequence = function(target) {

};
```

TypeScript

```typescript
function stringSequence(target: string): string[] {

};
```

C++

```cpp
class Solution {
public:
```

```cpp
    vector<string> stringSequence(string target) {

    }
};
```

C#

```csharp
public class Solution {
    public IList<string> StringSequence(string target) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun stringSequence(target: String): List<String> {

    }
}
```

Go

```go
func stringSequence(target string) []string {

}
```
